PROFESSIONAL SUMMARY

Second-year B.Tech Computer Science student at MIT Bengaluru with hands-on experience in AI applications, full-stack web development, and Retrieval-Augmented Generation (RAG) systems. Passionate about building practical AI solutions using Python, React, and modern LLM frameworks.

EDUCATION

B.Tech, Computer Science and Engineering 2024 – 2028

Manipal Institute of Technology, Bengaluru

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Machine Learning, Object-Oriented Programming

TECHNICAL SKILLS

Languages: Python, JavaScript, C, HTML, CSS

Frameworks & Libraries: React.js, Node.js, Streamlit

AI/ML: scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, FAISS, HuggingFace Transformers, LangChain

Tools & Platforms: Git, Firebase, Docker, N8N, REST APIs

Concepts: RAG, NLP, Chatbot Development, Semantic Search, Document Chunking, Prompt Engineering, Vector Embeddings

PROJECTS

AI-Powered Personal Finance Analyzer

May 2026 – Jun 2026

React.js · Firebase · Google Gemini API · Python · REST APIs

- Engineered a secure full-stack financial analytics platform processing CSV and PDF bank statements using AI and rule-based parsing, automating transaction categorization across multiple spending categories.
- Integrated Google Gemini AI to generate personalized financial recommendations and spending insights, reducing manual analysis effort for end users.
- Built real-time currency conversion dashboards with interactive data visualizations using React.js and Firebase, enabling dynamic expense tracking across currencies.

AI-Powered RAG Question Answering System

Jan 2025 – Mar 2025

Python · FAISS · HuggingFace Flan-T5 · Streamlit · NLP · Semantic Search

- Developed a Retrieval-Augmented Generation (RAG) application enabling users to upload or paste documents and receive context-aware answers through semantic search and natural language generation.
- Implemented FAISS-based vector retrieval with document chunking and Flan-T5 response generation, achieving low-latency question answering over custom document corpora.
- Designed an interactive Streamlit interface supporting dynamic document ingestion and real-time query processing, significantly reducing document lookup time over manual search.

ACHIEVEMENTS

- Secured 98.4% in SSLC (Class 10) with distinction — Vidya Vardhaka Sangha, Rajajinagar (2022)
- Completed PUC (Class 12) in PCMC stream with 94% — Vidya Mandir, Malleshwaram (2024)

CERTIFICATIONS

Fundamentals of AI Agents Using RAG and LangChain by *IBM*, Introduction to Front-End Development by *Meta*, Data Analysis and Visualization in python by *Microsoft*
